UNITED STATES CELLULAR CORPORATION
QUARTERLY E911 IMPLEMENTATION REPORT

United States Cellular Corporation (“USCC”), by its undersigned attorneys, hereby submits its seventh quarterly E911 implementation report pursuant to the Commission’s order staying certain E911 phase II deadlines for many non-nationwide wireless carriers.¹

I. Introduction

USCC is a Tier II carrier under the *Order to Stay* issued by the Commission in 2002.² As a wireless carrier with systems serving many small markets, USCC faces particular challenges in upgrading its technology and interacting with a wide variety of PSAPs across its service area. To meet these challenges, USCC has dedicated substantial financial and personnel resources to accelerate the deployment of E911 service throughout its service area.

¹ See *Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Phase II Compliance Deadlines for Non-Nationwide CMRS Carriers, Order to Stay*, 17 FCC Rcd 14841 (2002) (“*Order to Stay*”).

² *Id.* ¶ 23.

USCC personnel are in regular communication with PSAPs that are at varying levels of readiness in the provision of E911 service. In addition, USCC closely monitors its E911 vendors to ensure the progress of E911 deployment to all requesting PSAPs. In the past quarter, USCC completed a statewide phase I and phase II deployment in New Hampshire, a statewide phase I deployment in Maine, and a statewide phase II deployment in Vermont. USCC also proactively contacted every PSAP in its newly-acquired markets in order to coordinate the timely deployment of E911 service as USCC builds out these markets.

II. Status of Phase I Requests

USCC and its E911 vendor, TeleCommunication Systems, Inc. ("TCS"), actively work with all requesting PSAPs to deploy phase I E911 service throughout USCC's service area. In numerous cases, USCC has proceeded with deployment despite the fact that a particular PSAP request does not amount to a valid request for service under the Commission's rules, including in some markets where the PSAP made only an oral request. In addition, in USCC's newly-acquired markets, USCC has proceeded with phase I or phase II roll-out to the entire market despite, in some cases, no formal request from a particular PSAP within that market.

To date, USCC has received 712 requests for phase I service and successfully deployed phase I service to 583 PSAPs.³ Of the remaining 129 phase I requests, 107 have been pending less than six months. Attached as Appendix A is a spreadsheet identifying those PSAPs requesting phase I service and the markets where USCC has deployed phase I.

³ The number of phase I deployed PSAPs actually declined this quarter from the 610 reported in USCC's last quarterly report. The decline occurred because after the last reporting period, USCC sold all of its systems in south Texas. USCC had successfully deployed phase I service to all the PSAPs served by these systems prior to the sale.

USCC has 22 PSAP requests for phase I service that have been pending for more than six months. Of these requests, eight have been delayed by factors outside of USCC's control. USCC has a written extension from each of these eight PSAPs. In these cases, phase I deployment has been delayed because: (i) the PSAPs does not have the appropriate equipment to receive and implement phase I service; (ii) the PSAP only recently received and installed the appropriate equipment; or (iii) the PSAP is located at the meet point between two LECs which has created delays in trunk installation attributable to the LECs. In all of these cases, USCC remains in close contact with the PSAP to ensure an expeditious roll-out of phase I service as soon as the PSAP resolves any remaining obstacles.

Fourteen of USCC's phase I requests outstanding for more than six months are from PSAPs in markets that USCC has acquired within the last year. On August 1, 2003, USCC acquired several markets including St. Louis, Missouri, which covers PSAPs in several counties in Illinois. USCC is in the process of building out all of these markets and will deploy phase I service to PSAPs that have the ability to receive and utilize the information around the time that each market is activated. USCC estimates that the newly-acquired markets in Illinois will be active by September 2004. In all of its new markets, USCC proactively contacted the PSAPs soon after the acquisition to collaborate on the E911 roll-out.

III. Status of Phase II Requests

USCC continues to deploy phase II E911 service as required by the Commission's *Order to Stay*. To date, USCC has received 254 PSAP requests for phase II service. USCC has successfully deployed phase II E911 service to 150 PSAPs in its service area and currently has 104 outstanding PSAP requests for phase II service. Of these outstanding requests, 69 have been

pending less than six months. The attached spreadsheet identifies those PSAPs requesting phase II service and the markets where USCC has deployed phase II.

USCC has 35 phase II requests that have been pending more than six months. Fourteen of these 35 phase II requests are from markets that USCC acquired on August 1, 2003 and has not yet activated a cellular network. As discussed above, USCC is proceeding to build out these markets and expects to be able to deploy E911 around the time that each market is activated.

In 13 of the remaining markets with phase II requests pending more than six months, the PSAPs have requested a delay in phase II deployment in order to coordinate with the phase II deployment of other carriers serving the markets. The delays in an additional six of these markets are due to PSAPs not having or only recently receiving the necessary equipment to receive and utilize phase II information. One additional PSAP faces an issue with call blocking on the LEC side, and one PSAP encountered delays in approving maps and traffic plans that affected USCC's trunk installation. In all of these markets, the requesting PSAP has granted USCC an extension whereby USCC agrees to deploy phase II service within 60 days of the PSAP notifying USCC of its readiness. In these cases, USCC and its vendors have completed all the necessary steps toward phase II deployment and are waiting for the PSAPs to make the necessary corrections to or upgrade their systems.

In CDMA jurisdictions where new phase II requests have been received, USCC continues the process of installing necessary software loads on its switches to provide phase II service and upgrading all the trunking between these switches and the Mobile Positioning Center of its E911 vendor, TCS. USCC and TCS continually integrate the CDMA switches serving

these new phase II markets with the TCS equipment and the phase II software. USCC is also continually updating the Base Station Almanac (BSA) for all its cell sites serving CDMA markets where it has received a phase II request. The BSA helps to improve the accuracy of location information provided to PSAPs.

As noted in earlier Implementation Reports, USCC has contracted with Marconi Corporation to do the necessary calibration, accuracy and drive testing to ensure that USCC's phase II service meets the Commission's accuracy requirements. Marconi has conducted testing on USCC's CDMA switches that are serving PSAPs with live phase II deployments. These tests have been conducted using the CDMA location-capable mobile phones currently available to USCC's customers. Marconi's accuracy test results confirm that USCC is meeting the Commission's requirement that 67 percent of the calls are accurate to within 50 meters and 95 percent of the calls are accurate to within 150 meters.⁴ Marconi performs a complete accuracy test every six months on every USCC switch that has PSAPs deployed phase II.

IV. Status of Handset Deployment

USCC remains in compliance with the applicable handset deployment benchmarks.⁵ USCC has far exceeded the Commission's applicable handset penetration benchmark for this quarterly reporting period – namely, that at least 50 percent of new handset activations be E911 capable by November 30, 2003. In March 2004, over 93 percent of the total handsets sold by USCC had E911 capability. To date, USCC has achieved a one-third total customer penetration rate for GPS-enabled phones.

⁴ 47 C.F.R. § 20.18(h).

⁵ See *Order to Stay* ¶ 27.

Currently, USCC has seventeen GPS-enabled handsets available for sale in its CDMA markets: Motorola v120e, Audiovox CDM8500, SonyEricsson T206, Kyocera 7135, Audiovox 9500, Nokia 3585i, Nokia 3586i, Kyocera 3225, LG VX4400, Motorola T731, Kyocera Kx414e, Kyocera SE47, LG vx3100, LG vx6000, Audiovox 8410, Motorola c343, and LG vx5550. USCC no longer places any purchase orders for non-E911 capable CDMA handsets nor does it restock non-E911 capable CDMA handsets sold at USCC's retail locations. In May, USCC is planning to pull back any non-E911 enabled GPS phones still in inventory at all its retail locations in CDMA markets.

USCC will continue to track its sales of GPS-enabled phones in order to ensure compliance with the penetration benchmarks in the Commission's *Order to Stay*. At this time, however, USCC anticipates that it will be unable to meet the May 31, 2004 deployment benchmark that 100 percent of new activations be GPS-enabled handsets because it has not yet completed the last part of the CDMA overlay in a few rural markets. The CDMA overlay is scheduled to be completed on or around July 1, 2004 in the Idaho markets, on or around October 1, 2004 for the California markets, and by the end of June 2005 for the Ft. Pierce, Florida market. Once the overlay is complete in any market, USCC will offer only GPS-enabled phones for sale in that market. Although USCC will not attain the 100 percent new activation benchmark by May 31, 2004, it anticipates that 95 percent of all its new handset sales will be GPS-enabled by the end of May 2004.

V. Conclusion

As demonstrated above, USCC continues to make significant progress in deploying E911 phase I and phase II service throughout its service area. The commitment of

significant financial and personnel resources has enabled USCC to move closer to its goal of meeting or exceeding the Commission's implementation deadlines for E911 deployment.

Respectfully submitted,

UNITED STATES CELLULAR
CORPORATION

Revision of the Commission's Rules) CC Docket No. 94-102
To Ensure Compatibility with)
Enhanced 911 Emergency Calling Systems)
)
-----)

AFFIDAVIT OF JAMES JENKINS

I, James Jenkins, hereby declare as follows:

1. I am Vice President, Legal and External Affairs, for United States Cellular Corporation ("USCC"). In this capacity, I am familiar with USCC's E911 deployment efforts.
2. I have reviewed the foregoing USCC Quarterly E911 Implementation Report and believe that the facts contained therein are true and accurate.

I declare under penalty of perjury that the foregoing is true and correct, to the best of my knowledge and belief.

Dated this 3^a day of May, 2004.

James Jenkins

CERTIFICATE OF SERVICE

I, Thaddeus Stringer, do hereby certify that on this 3rd day of May 2004, copies of the foregoing "United States Cellular Corporation Quarterly E911 Implementation Report" were served by U.S. first-class mail, postage prepaid, to the following:
